

Type:
Data
Management

Geography:
Global

Service Type:
FSP

Client:
Mid-size Pharma

PROJECT SUMMARY:

Global multi-functional Data Management FSP

Objective

Sponsor needed global Data Management support for their development pipeline, and strategic partner in migrating to a new EDC system

Study Challenges:

- Multiple functional partners were burden-some to oversee
- Sponsor wished to migrate to a new EDC technology

Excelya Solutions:

- Strong and dedicated talent acquisition infrastructure to scale up to **60+ FTEs across EU, India and US**
- **End-to-end Data solution** handling on eCRF development, UAT, Discrepancy Management & External data acquisition & maintenance across 15+ studies
- Devised a sophisticated RACI to ensure clear boundaries on tasks at hand eliminating ambiguity during transition and beyond
- Deployed a trained team on the new EDC system selected by the sponsor
- Successfully implemented a vigorous **platform ramp up from 6 FTEs to 30+ FTEs in first phase within 8 months**

Business Impact:

- Enriched onshore-offshore collaboration to provide seamless delivery
- Actively supported sponsor in developing a time sensitive comprehensive plan to migrate existing priority studies to new EDC platform
- No disruption to their active studies
